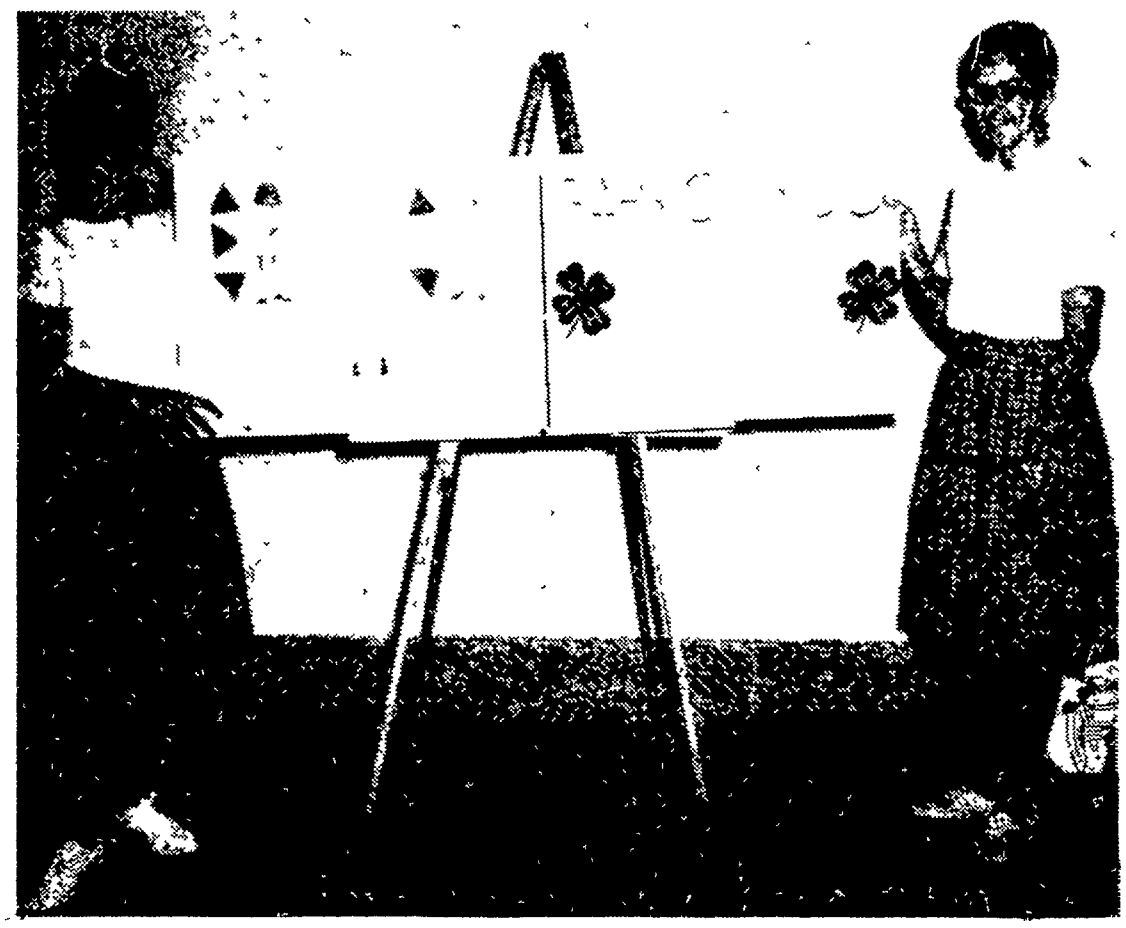
County Youth Travel to Penn State



4-H DEMONSTRATION DAYS at Pennsylvania State University will find these two youngsters prepared. Marcella White, Manheim R3 (right), and Belinda Hershey, 742 Pearl Ave., Manheim, pose before the exhibit which they hope will bring them ribbons at the show.

4-H Demonstration Days At Penn State Next Week

Boys and girls from all over the Garden Spot will take to busses on Monday and head off for the annual 4-H Judging and Demonstration Days at Pennsylvania State University

The show will last from August 13 to 15 and will feature exhibits contests and judging in almost all phases of 4-H work

Youngsters going on the trip are urged to be at Lampeter-Strasburg High School Lampeter, on Monday morning by 8 a m. Cost for the Club Week is $11 00, which must be paid in advance to the Lancaster County Agricultural Extension Service

Attire for the affair will be cotton dresses or blouses and skirts for the girls, clothes suitable for baseball, recreation and a raincoat and some dress clothes for the boys.

Anyone having any questions about the trip should contact the Extension office

The delegates will return home on Wednesday afternoon.

Garden Spot Baby Beef Show and Sale Aug. 15

It is show time again at the Lancaster Union Stock Yards with two stellar events scheduled for the month of August

Coming up first on the agenda is the **40th Annual Garden Spot Baby Beef Show and Sale** to be held August 15th. This is the Stock Yards own event sponsored to encourage steer feeding among the children of the livestock feeders of this market area. Two generations of farm folk have participated in this event over the years. Many of our present day livestock feeders got their initial start in feeding animals by participating at a very early age in the Garden Spot Baby Beef Club event The Show will be held in the inside parking lot at the entrance to the Yards Wednesday morning starting at 9 00 A M The Sale of the show baby beef will take place at 1 00 P M in the sales barn at the lower end of the Yards. Yarding of the baby beeves will take place on **Tuesday**, August 14th Weighing starting at 6 00 A.M. Wednesday morning

The next event is scheduled for August 22nd when the **Lancaster County 4-H Pig Clubs** will stage their **Round-up and Sale** at the Lancaster Union Stock Yards. Nine community clubs with 40 - 50 youth participating will gather in the Round-up to show the product of their efforts to raise pigs to the finish of market type hogs There will be judging in all the major breeds at the show to be held Wednesday morning starting at 8.00 A M in the hog barn Competition will be in light, medium and heavy weight classes of each breed with the final judging of the Champion of the Show and the Champion pen of 10 market hogs. 4-H members age 10 - 21 will participate.

In the afternoon starting at 1:30 P M the market hogs will be sold at auction in the hog barn

Farm Calendar

Aug. 13-15—State 4-H Judging and Demonstration days at the Pennsylvania State University.

Aug. 13 — Lancaster County Soil Conservation District Meeting at 8 00 p m in the County Commissioners Office.

Aug. 13-15—4-H Judging and Demonstration Days at the Pennsylvania State University.

Aug. 14 — Lancaster County Holstein Club Barn Meeting at the Albert Fry Farm at 7:30 p m.

Aug. 14—Yarding of baby beef animals for the Garden Spot Baby Beef club show and sale.

Aug 15 - 9 a m —Judging of Garden Spot baby beef steers at the Lancaster Union Stockyards
1 p m —Sale of steers in the Garden Spot baby beef club show

Aug 15-17 — First National Grasslands Field Days at Hershey

Aug. 16 - 7 30 p m.—Manheim Young Farmers Association meets in the Manheim Central High School. Discussion of Rural Planning and the Farmer.

Aug. 16-18—Rough and Tumble Engineers annual meeting at the association's grounds at Kinzer.

Gigantic Ox Roast Is On Menu At First National Grasslands Day

HERSHEY, Pa —Imagine a 3,000-pound roast in the oven and company to eat it.

That's in store for the first National Grassland Field Days, August 15-17, on the 10,000-acre Milton Hershey Farms, 15 miles east of Harrisburg And what's more, it's only part of the menu being readied for the expected throngs of visitors

The big roast, in earth pits on the grounds, will be put on by the Pennsylvania Livestock and Allied Industries Association. John G. Stephen, Allentown, PLAIA president, today said one and one-half tons of choice beef — enough to serve 10,000 persons—will be roasted each day.

Twelve pits, each 3½ feet wide, 3½ feet deep and 15 feet long, will be filled with good hardwood—oak or hickory. Half of the pits will be fired 11 a m to 11 p m , Aug. 14, to be ready for the first day's crowd. At 11 p m. the coals will be raked and covered with an inch of clean sand or fine stone The meat, in 8 to 15 pound cuts wrapped in cheesecloth and new burlap, will be placed over the coals. Pits will be covered with metal plates and stacked with loose earth to seal in the heat

Twelve hours later — 11 a. m. on opening day—the pits will be opened, the meat re-

(Continued on Page 12)

Rod Heinrichs Is Shutterbug Farmer

When most of us think of agriculture we naturally think of farming—and when we think of ag. students we associate them with future farmers.

However, C Rod Heinrichs, 320 New Street, has pulled a switch on the old maxim.

For, although he was an agriculture student in college, majoring in animal husbandry — he is now, by profession, a photographer.

An agricultural photographer, that is.

With the advancements in agriculture and agricultural machines and processes there is a demand for men who know agriculture — and photography — —to supply manufacturers and farm magazines with up-to-date, professional photographs of farming and farming methods.

One of the most successful men in this field is Grant

(Continued on Page 10)

Agri. Teacher Is Honored By Natl. Guard

Harold R McAllister, teacher of vocational agriculture at the Manheim Central High School was awarded a plaque, symbolic of highest leadership rating, by the Association of the U S. Army last Saturday. At the same time he was commissioned a Second Lieutenant in the Pennsylvania Army National Guard.

The award was made at the graduation exercises of the Officer Candidate School, Pennsylvania Army National Guard at Indiantown Gap

McAllister, in addition to the top rating in leadership, was second in academic standing in a class of 33, all that remained of the more than 150 who began the course The award was sponsored by the National Guard Association of Pennsylvania, and all the awards were presented by Major General Malcom Hay, Adjutant General of Pennsylvania.

George W. Myers, teacher of vocational agriculture at Lampeter-Strasburg High School also won a promotion in the U S. Army Reserves this week. Myers was promoted from the rank of Major to Lt Colonel. He is operations and training officer of the 7472nd Transportation Staging Station in Lancaster.

FIVE-DAY WEATHER FORECAST

Saturday-Wednesday

Temperatures during the next five days are expected to average 2 to 4 degrees below normal with evening temperature 64 degrees and afternoon temperatures 84. Cool Saturday with rising temperatures thru Tuesday, turning cooler Wednesday. Percipitation Saturday thru Wednesday .1 inch or less. More Showers and Thunder showers Wednesday. Rainfall to date at Lancaster was reported at 4 inches.

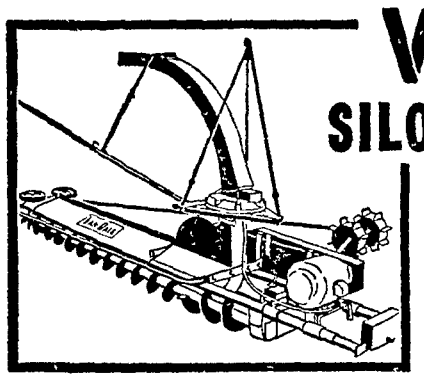
Complete automatic feeding for DAIRY COWS and CATTLE!

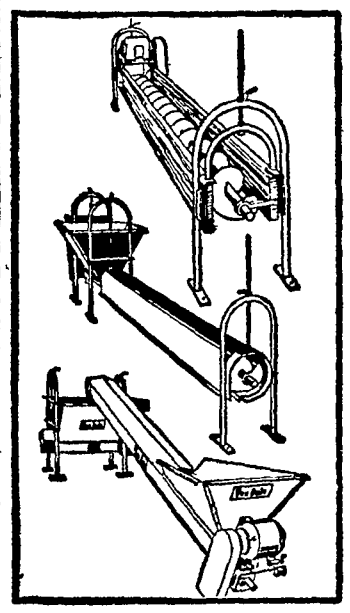
VanDale SILO UNLOADERS



Double augers deliver more silage per minute even when silage is deeply frozen . . . and at a lower operating cost. Patented V-paddle impellers *throw* . . . not blow . . . silage down chute. Adjustable drive hubs give positive traction in all types of silage.

Three-point suspension keeps unloader level at all times.

Plus a complete line of bunk feeders to meet your exact needs



Straight-out Auger Feeder

With VanDale units you can custom build the bunk feeding set-up to fit your needs. Drive section includes hopper, drive assembly and 10', high capacity 9" auger. Additional auger sections are in 10' units and are easily coupled.

Feed-R-Flo Bunk Feeder

The new, all-metal complete feeder. High capacity 9" auger rotates within tube. Gives all-weather protection, even feed distribution, and lower operating cost.

Conveyor Trough

An important link in automatic feeding. Positioned below silo chute, the VanDale conveyor trough carries the silage to the bunk feeder. Primary section includes hopper, drive assembly, and 10', 9" auger. Additional 10' auger sections may be added.

See us for modern automatic feeding equipment

From Where We Stand . . .

Bouquet To FFA

Nearly 200 teen-age boys descended on the Legion Memorial Field at Quarryville last week, and conducted themselves with such dignity and good manners that other visitors of the park were moved to comment on their excellent behavior.

It was not that the boys were restricted in their activity or that they sat around doing nothing. On the contrary, a lively ballgame was followed by a chicken barbecue with each of the 200 eating chicken and cheering for their local players.

But the significant thing, we think, is that teen-age boys should conduct themselves with enough aplomb to attract the attention of visiting adults.

We want to pass on our compliments to the County Association of Future Farmers for the way in which they had the evening affair planned and in the excellent manner in which the boys conducted themselves

Compliments too, we believe, are due to the teachers of vocational agriculture of the county who put the boys on their good behavior before they ever neared Quarryville

We firmly believe that many teen agers do things we wish they would not do simply because we never tell them what we do want them to do. Too often young people are not directed, or are misdirected by careless instructions, and then we adults criticize their actions.

Future Farmers and their leaders can be proud of their reputation, and from all reports, they are working to keep that reputation shining.

At least that's how it looks from where we stand

★ ★ ★ ★

Grassland Day

It is not often that an event of national significance comes near enough home to be within easy driving distance.

And so often such events come at a busy time on the farm when it is hard to get away for a day

But this year a significant national agricultural event is happening near home and at a time when there is not much going on at home And best of all — the entire thing is free to all who will take the time to drive to Hershey next week.

We believe it will be a day well spent by you and your family taking in the events, demonstrations and exhibits on the sprawling Hershey Estate Farms.

With over 25 acres devoted entirely to machinery exhibits, and with nearly a hundred acres set aside for demonstration purposes during the days and the facilities of the entire far-flung farms to draw upon, The First Annual National Grasslands Field Days promise to be one of the biggest and most significant agricultural events of the year in the Eastern United States.

Machinery and methods for all phases of grassland agriculture from seedbed tillage to utilization of the forage by the animal will be on display and in demonstration. Back this up with The North American Hay Show, the State Plowing Matches and educational exhibits by many Landgrant Colleges and agricultural and allied industry associations, and you begin to get an idea of the magnitude of the event.

Again we repeat, a day at Hershey during Grassland Field Days will be a day well spent

At least that's how it looks from where we stand

★ ★ ★ ★

Perseverance Pays

It is not often that an individual or a partnership becomes the subject of discussion in this column, but when we hear of an outstanding display of courage and determination, we like to comment on it

In the summer of 1960 two young men from out of state moved into the county and began a radically new program to produce high-quality disease-free foundation breeding swine.

Through no fault of their own, disease stalked in, as it sometimes does on any farm. But this was a particularly contageous disease which meant sell the entire herd and begin all over after disinfection and keeping the houses empty for a long period.

Such a program would have been disasterous to the young men who had invested a good portion of their savings in foundation sows.

There was one alternative program, and the partners followed it to the letter. They saved their costly bloodlines by catching the baby pigs in a plastic bag at farrowing time and removing them to an isolated starting and growing unit

The young men "bagged" 62 pigs and raised 73% in isolation on artificial milk After sacrificing seven of the pigs for post-mortem examinations by veterinarians and slaughtering the rest of the herd, they were "back in business", even if on a much less grand scale.

The point is, they were not willing to accept less than the best even though the best was costly and time consuming.

We need more such courage and perseverance as this

At least that's how it looks from where we stand

SHEEP: 38 Cull to Choice shorn slaughter ewes 5 50-7 00.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY DR. KENNETH J. FOREMAN

Bible Material: Ezekiel 1 1-3, 2 1-7, 3 4-5 10 11 11 16-19, 18
Devotional Reading. Psalm 130

Responsibility

Lesson for August 12, 1962

"RESPONSIBLE" and "responsibility" are words perhaps hard to define, but they will strike any thinking person as important words We all know in a general way what they mean When we speak of an irresponsible person we speak in disparaging tones, we don't trust a person like that An irresponsible person can't be depended on to do what he is expected to do. The difference between an irresponsible person and an absent-minded one is not that one remembers what he is supposed to do and the other one doesn't, they both will forget But the absent minded man is overwhelmed by regret and mortification at having forgotten, while the irresponsible one doesn't care even if he forgets a dozen times

Dr. Foreman

Single, Plural and Collective

To be responsible means that someone is expecting you to do a job or to be a particular kind of person It means also that you are expected to give an account of yourself to some one. You are responsible for the job and to the boss, or the inspector, whoever gets your report No matter how high your perch is in society, you are always responsible to some one the President of the U S A is responsible to the people, and we judge presidents by how well they carry that responsibility

But more than individuals can be responsible. A whole group of persons can be responsible in the same way, to the same person and for the same work, like a class in school with a problem to solve This we can call plural responsibility Again there is collective responsibility, as when Jacob, in the Genesis story, holds all his sons responsible for the welfare of Joseph We can say that a community is responsible for its own health—that again is collective responsibility

Yes, but some one asks, does not that keep us robbed of happiness? Quite the contrary: there is no such great happiness in holding on to blessings as there is in sharing them Do people ever thank God for you? You may not be able to answer that, because you don't know.

Peace

Another great word here . . . "Peace." God makes a covenant —an agreement—of love with his people. Every dealing of God with men is rooted and founded in love. This cannot be otherwise if God is love. But this prophet brings out the way love is shown—and one way is the way of peace. Our God, the only true God, is a God of peace, not strife, anger, violence There is something wrong with the picture when so-called and self-labeled Christians keep sniping at one another and calling names. There may be no possibility of union between your church and some other, but even where that is true, you do not manifest your Christianity by calling names and "running down" other Christians who do not believe just in the way you do. Furthermore, to take another illustration, it ought to hurt our consciences that the so-called Christian nations of the world seem to be the most violent war makers As individuals, as churches as a nation, do we really act as if we belonged to the God of peace?

Security

A third great idea, a third great promise of God to his true people, is security. We know, if we have any experience at all, that God guarantees no man security from all human and earthly troubles. Commentators are not all agreed whether this reference in Ezekiel to security should be taken literally or not One thing should be clear If not even the prophet Ezekiel was immune from troubles (he lost his wife, and mourned deeply the fall of Jerusalem), God's people should not expect total freedom from pain, frustration and death, not to mention other ills So those who think we should take the part about security literally, usually believe it must mean at some time after the last judgment, not now. However this may be, the believer in God can be assured that God will not let him be wholly destroyed, not even by death To the Christian, death is not the final crash; it is God's summons to a world of glory The Christian has the deepest security of all—security against the fear of death.

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U S. A Released by Community Press Service)

Now Is The Time . . .

BY MAX SMITH

MAX M. SMITH

To Be Careful With Sudan Grass

After a period of drought conditions, new growth of sudan grass should not be grazed until it is 16 to 18 inches tall; this new growth may be high in prussic acid and poison livestock Many areas might have received sufficient rain in the past week to bring along this new growth at this time.

To Fertilize Grasslands

Livestock producers are urged to fertilize hay and pasture areas that have been made un-productive in recent weeks due to dry weather. Nitrogen on the straight grass stands and a complete fertilizer on the grass-legume mixtures should result in lush growth when sufficient rain does fall. On hay fields this might make possible a very good final cutting late this fall.

To Make Silage From Stunted Corn

Many fields of corn, may not be helped to the extent of a good yield of crib corn even though good rains would come in the near future; this means that the corn will give greater amounts of feed nutrients if made into silage. No preservative will be needed and all types of livestock may be fed this type of corn-fodder silage. As long as their is the possibility of a good rain helping more growth and development of both the corn plant and the ear, the corn should remain standing; don't ensile the corn until it is definitely drying up in the field.

To Be Alert For Poisonous Weeds

During drought conditions and very little pasture many animals will seek green forage in woods, along fence rows, creek banks, and many places where otherwise they would not graze In many cases they will eat green plants that are poisonous and plants that normally they would not touch

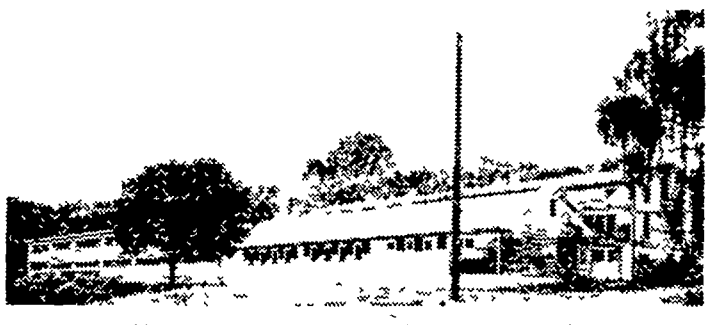
(Continued on Page 5)

What About

MORE PROFITS From BROILERS?

8 week old broilers in a test pen at the Fruitville Farm.

As a result of the continuing and intensive research of our Nutrition Department, Miller & Bushong, will on Monday, August 13, start the marketing of



Fruitville Farm, one of the two Early Bird Broiler Research Stations.

EARLY BIRD NEW IMPROVED BROILER RATIONS

● What Is Different About These Rations?

1. A DIFFERENT and MORE EFFICIENT balance of the amino acids.
2. ANOTHER SUBSTANTIAL INCREASE in the energy value.

● How Will These Rations Perform?

With these rations LESS FEED per lb. of broiler will be required.
Our field tests indicate an average 7% improvement in feed conversion.
The grower who has been getting conversions in a range of from 2.15 - 2.25, can with equal management and environmental conditions expect meat/ feed ratios of from 2.00 to 2.10.
This means an INCREASED YIELD of about 67 lbs. of broiler meat per ton of feed.

(At 15c PER LB. OF MEAT THIS MEANS AN EXTRA RETURN OF $10.05 PER TON OF FEED USED.)

● How About Production Costs?

The net result will be a
SUBSTANTIALLY LOWER COST PER LB. OF BROILER MEAT PRODUCED.

REMEMBER

(Continued from Page 4)

This means that all livestock producers should be on the watch for these plants and for animals not normal Symptoms include slobbering from the mouth, unstable gaits, staggering, trouble with their breathing, and bleeding from the nose as well as with their droppings Nightshade, bracken fern, poke berry, water hemlock, and wilting wild cherry leaves are common plants that could cause trouble

New Providence 4-H Club Holds Picnic

A joint picnic and meeting was held at the F. D. Atkins farm by the New Providence 4-H Club for members and their families On the agenda for the day was swimming, games, and dinner

Robert Henry, New Providence R D #1, and Jay Lehman, Holtwood R D #1, gave their demonstration, "The correct Planting of an Evergreen"

It was announced that the nett meeting will be held August 30, at New Providence Elementary School at 7 30 P.M.

Farmers Urged To Cast Ballot In ASC Election

Fred G Seldomridge, Chairman of the Lancaster County Agricultural Stabilization and Conservation Committee issued an appeal to county farmers to vote in the election of ASC county and community committeemen to serve for the 12 month period beginning October 1, 1962 and extending through September 30, 1963

For each community committee three regular members will be chosen, with the person receiving the highest number of votes becoming chairman Two alternates also will be elected in each community, to serve in the absence of a regular member The elected chairman of the community committee will also serve as delegate to the county convention to elect the county committee.

ASC Community Committees will be elected for 1963 in each of the following Communities #1 Conoy, W Donegal & Mt Joy Townships, #2 East Donegal & W Hempfield Townships, #3 Rapho Township, #4 Penn, Warwick & Elizabeth Townships, #5 E Cocalico, W Cocalico, Brecknock Townships; #6. DHIA RECORDS TELL SUCCESS STORY

MILK PRODUCTION UP 1441 lbs.

BUTTERFAT UP 82 lbs.

Reprinted From
"THE GOLDEN GUERNSEY NEWS"
July 1962 Issue

The Guernsey herd of Francis and Ethel Kirk, Peach Bottom, Pa., has certainly shown a tremendous amount of improvement the last two years. Last year, on DHIA test, the herd increased 1441 lbs. of milk and 82 lbs. of fat, and this year, in the first seven months, the herd average has increased another 40 lbs. of fat. Foregoing any change in the present production, the herd should finish with well over 10,000 lbs. of milk and over 500 lbs. of fat. Their young sire, Carroll's Rob, has been one of the big reasons for this tremendous improvement. He was bred by Lloyd Balderston III, Colora, Maryland.

FRANCIS and ETHEL KIRK say . . . .

. . . we're convinced that Farm Bureau's DARI-PAK PELLETS make more milk and they are economical, too. Our income over feed cost is UP $46.00 per cow over last year. Our cows really go for those pellets. They clean them up quickly and completely — no feed waste or spoilage here. The Grain Exchange Program, which gives us FULL RETAIL PRICE for our home grown grain, is a great thing. In short, we're more than pleased with the Farm Bureau Dairy Feeding Program.

We at FARM BUREAU say . . . .

Francis and Ethel are milking a fine herd of "68" Guernseys. Their excellent breeding program and terrific management have played the key roles in their success. As mentioned in the Golden Guernsey News, they have an outstanding young sire, Carroll's Rob, who has proved to be a real asset. Of course, we're mighty proud that Farm Bureau's DARI-PAK PELLETS, carefully formulated and balanced with the proper milkmaking nutrients, helped the Kirk's accomplish their very excellent record.

FRANCIS and ETHEL KIRK PROUDLY DISPLAY
Farm Bureau's DARI-PAK PELLETS.

Ice Cream "Saucery"

By Mrs. Richard C. Spence

Ice cream is the American's favorite dessert anytime, but especially so in the summertime 'Just plain' ice cream is good but dressed up with a luscious sauce it is extra delicious. Why not try some of the sauces we have for you today Most of these sauces can be made ahead and stored in the refrigerator

One never goes wrong with a chocolate flavored sauce Here are some we know you'll like

SPEEDY FUDGE SAUCE

BASIC SAUCE

1 6-ounce package chocolate bits (semi-sweet)
⅓ cup sweetened condensed milk
⅓ cup water
1 teaspoon vanilla

Melt chocolate bits over (not boiling) water. Add condensed milk, water and vanilla Serve warm.

VARIATIONS: Add while warm, one of the following:

1. 1 teaspoon instant coffee
2. ¼ cup marshmallow cream
3. ¼ cup peanut butter
4. ½ cup shredded or toasted coconut
5. ½ cup salted peanuts

After standing, sauces may be thinned by adding a small amount of boiling water.

* * *

LUSCIOUS FUDGE SAUCE

½ cup light corn syrup (for maple-flavored sauce, substitute maple-blended syrup for corn syrup)
½ cup evaporated milk
2 tablespoons water
1 cup (6 ounces) semi-sweet chocolate bits
1 teaspoon vanilla

Combine corn syrup, evaporated milk and water and bring just to a boil, over low heat, stirring constantly. Remove from heat; add chocolate bits and vanilla at once and stir till blended and smooth. Serve warm over ice cream or warm cake. Makes 1-⅔ cups.

Sauce may be reheated over hot water.

* * * *

CREAMY CHOCOLATE SAUCE

¼ cup honey
1 tablespoon water
1 cup (6 ounces) semi-sweet chocolate bits
1 teaspoon vanilla
1 cup heavy cream, whipped
⅓ cup water

Combine honey and water in small saucepan and bring just to boil over moderate heat, stirring constantly. Remove from heat. Add chocolate bits and vanilla and stir till blended and smooth Cool about 10 minutes Fold in whipped cream, blend in gradually the water. Serve over ice cream or cake at once or chill before serving. Makes about 3 cups.

* * *

CHOCOLATE MARSHMALLOW SAUCE

½ cup milk
¼ cup butter or margarine
⅛ teaspoon salt
1 cup (6 ounces) semi-sweet chocolate bits
1 teaspoon vanilla
1 7-½ ounce jar marshmallow cream

Combine milk, butter or margarine, and salt and bring just to boil over moderate heat, stirring constantly. Remove from heat and add chocolate bits and vanilla; stir till blended and smooth. Beat in marshmallow cream gradually. Serve over ice cream or cake. Makes 2-¼ cups.

* * *

CHOCOLATE DESSERT SAUCE

2 eggs
½ cup sugar
1 stick butter
2 squares semi-sweet chocolate, melted

Mix eggs and sugar in top of double boiler. Cook, stirring constantly, until mixture is amber colored. Add butter and chocolate Continue heating, stirring constantly until butter is melted. Store in refrigerator.

CHOCOLATE PEANUT SAUCE

1 6-ounce package semi-sweet chocolate bits
½ cup peanut butter
¾ cup milk

Melt chocolate bits and peanut butter over hot water. Blend in the milk. Serve warm over ice cream or cake. Makes 1-¾ cups.

* * *

OLYMPIA CHOCOLATE SAUCE

1 14-ounce can (1-¼ cups) sweetened condensed milk
¼ cup butter
¼ teaspoon salt
1 6-ounce package chocolate bits

S. H. Hiestand & Co.
SALUNGA, PA.

1 teaspoon vanilla
¼ cup water

Combine condensed milk, butter and salt in small, heavy saucepan and bring to boil over moderate heat, stirring constantly. Boil 1 minute, stirring constantly. Remove from heat and add chocolate bits and vanilla; stir until blended and smooth. Stir in water gradually. Serve over ice cream or warm cake. Makes 2 cups.

* * *

SKILLET SUNDAE SAUCE

¼ cup butter
1 cup coarsely chopped walnuts
1 cup (6-ounces) chocolate bits

Melt butter in heavy skillet. Add walnuts and stir constantly over moderate heat till nicely browned. Remove from heat and add chocolate bits: stir till melted and smooth. Makes 1-¼ cups.

* * *

BUTTERSCOTCH ICE CREAM SAUCE

2 teaspoons cornstarch
¼ teaspoon salt
¾ cup orange juice
½ cup light corn syrup
⅛ teaspoon peppermint extract
1 6-ounce package butterscotch morsels
1 cup miniature marshmallows

Mix cornstarch and salt in saucepan. Combine orange juice, corn syrup and peppermint extract and stir in gradually. Cook over moderate heat till slightly thickened, stirring constantly. Add butterscotch morsels and stir till melted. Remove from heat and add marshmallows. Stir till partially dissolved. Serve warm over ice cream or cake. If sauce becomes too thick, reheat over hot water. Makes 2 cups.

Consumers used 9½ pounds of margarine in 1961 as compared to four pounds in 1946. The 9½ pounds is an all time record.

Sealing Failures In Home Canning

Leaving the wrong amount of headspace when filling jars Follow instructions in your canning manual for amount of headspace to leave for the food you are canning.

Using jars for canning in which commercial food is sold. Commercial food jars are designed for use on high speed packing machine with caps developed for the product being packed

Not taking time to get out all the air bubbles in the jar

Failing to screw bands down evenly all the way around.

Screwing bands too tight A band must be tight enough to hold the rubber sealing compound closely against the top of the jar.

Not screwing band tight enough

Reusing lids. The lid of a two-piece metal cap should not be used more than once. This applies to all brands of lids

Not removing particles of food, seeds, or seasonings from the top and threads of jar before putting on lid.

Letting pressure the canner fluctuate. . this can cause food particles to be forced between jar and lid

THURSTON

Feeding Your Preschool Child

The two-through five-year-old child has ideas of its own about food It is helpful if you try to see food from his viewpoint. His feeling and his hunger influence his appetite. An angry child won't eat . an unhappy child picks at his food

A preschooler is sensitive to the appearance, texture, flavor and temperature of foods.

The young child likes the pudding with the red cherry on top . .he likes foods that are easy to eat, such as meat

PHOTOGRAPHY ON THE FARM

Rod Heinrichs, local agricultural photographer, takes his camera in close to photograph insect damage on a cluster of peaches.

● Heinrichs

(Continued from Page 1)

Heilman who has his studio in Lititz R3

However, a year or so ago, Grant began to feed that he could use assistance on the technicalities of agriculture — se he hired Rod

Rod assists in setting up technical subjects for photographing and keeps a constant eye out for subject vacancy in the files

But the photo bug hit Rod about January — and since then has been taking agriculture pictures on a steady schedule

Rod explains his job by saying that he's supposed to know what they should have on their files — and then to arrange to have them

The files consist of over 10,000 pictures of farm life and equipment.

An example Rod quotes is the "problem of the potash deficiency"

Three weeks ago the shop got a call from an agricultural advertising firm in Philadelphia asking if they had a picture of an ear of corn showing a potash deficiency

They did not Now it is Rod's job to either find a plot of corn with that problem, or to creat the problem with his own patch so that they can get a picture of it

First he will contact nearby universities to see if they are running any experiments of that type — if that fails he'll just have to wait till next spring and "do it himself"

His wife, Rae, who stocks her larder with the produce from the garden states that he is the only gardener she knows who will, at times, go out of his way to produce a poor crop—and then try to explain it away by saying it's all in the interest of science

Since Rod has joined the Heilman staff the shop has also been taking a lot more pictures of insect life and of rodents

This winter, when the snows had them pretty much pinned to home base, they set up in the studio and took natural shots of rats, mice and houseflys as well as several close ups of chickens and chicken types

All of these pictures will appear, sooner or later, either in advertisements for farm equipment or supplies — or as part of farm stories in national farm magazines

Both Rod and Grant also take a lot of trips during the year—in fact, they like to travel at least three times a year, for three to four week stretches

All of the trips are to agricultural areas where they fill in on photographs unavailable in the vicinity

At present Grant is in Colorado getting pictures of round-ups—and of giant combine operations

On the trips the wife and family sometimes go along

Rod states that it is seldom that they will take on a specific asignment for a company explaining that they would want to keep the operation as low pressure as possible

He explains that sometimes it will take four to five hours and perhaps twenty photos, to get just what they want

"Nothing gives a man more leisure than being on time for appointments."

They feel that working for an agency, with a dead line, would rob them of this freedom—and would force them to take mediocre, rushed, pictures

Rod, who is a native of Canada, graduated with a degree in animal husbandry from Ontario Agricultural College, Guelph, Ontario He met Grant during a four-year stay in the states before he started college However he did not start working for him until last year.

Rod and his wife Rae, have one son, Ward, two.

● Have You Heard?

(Continued from Page 9)

patties and mashed potatoes. He likes food in small peices that he can pick up in his fingers -- toast strips, orange sections, carrot strips. He likes interesting shapes .. tomato wedges, cookies shaped like animals He likes small servings and he likes to serve himself

Vegetable Cooking Tips

Two rules for cooking vegetables to keep the most nutrients are Cook vegetables as quickly as possible, and cook them in the smallest possible amount of boiling water.

Loss of nutrients increases with the length of time vegetables are cooked Cook vegetables only until tender, perhaps a little on the crisp side, and they'll save loss of food values

Put the vegetable into boiling water. A fairly large loss of Vitamin C occurs during the time it takes the water to begin to boil.

Recommended ways for cooking vegetables are: Pressure cooking, steaming, or cooking quickly in just enough water to prevent scorching in a tightly covered utensil.

Vitamin C the B-vitamins and some minerals are soluable in water, especially hot water. This means, if you discard the liquid when vegetables are cooked, you throw away valuable nutrients. Better to use just enough water to cook the vegetables so there'll be little or no cooking liquid left.

Never add baking soda to keep vegetables green-soda destroys vitamin C.

Flying Fingers 4-H Club Meets

The Flying Fingers 4-H Club held their final meeting of the season on Monday evening at the home of their leader, Mrs Willis Bucher, this concludes the series of eight lessons. There were twenty three girls took the course and three will participate in the Dress Revue to be held in the Penn Manor High School on August 9th.

They are Cynthia Bucher who has completed seven years of 4-H work, three years sewing and four years cooking She will wear a brown wool two piece dress Mary Alice Graybill who had six years of sewing will model a beige fall coat and green dress. Lois Bomberger with five years of sewing made a navy blue wool skirt, red over blouse and a white wool blazer

Plans for the Club to present a program at the United Zion Home on August 20th were completed, this is the Community project for the year. They also plan to have a picnic at the Springs Park on Tuesday, August 21st.

The assistant leader is Priscilla Bucher and the Junior leaders are Mary Alice Graybill, Lois Bomberger, and Cynthia Bucher.

• ASC Election

(Continued from Page 6)

Encumbent committees in each community will submit a slate of nominees to the ASCS County Office by August 15th, and ballots will be mailed to all farmers in the County on August 24th Ballots must be returned to the office no later than September 4th.

In addition to the slate of nominees submitted by the Community Committees, nominations may be made by petition Petitions signed by 10 or more eligible voters, nominating persons for membership on the Community Committee will be received at the County ASCS Office at any

Names of persons nominated by proper petition will be included in the slate of nominees if found eligible and willing to serve. If a person nominated is found to be ineligible, he will be notified of such determinations prior to completion of the slate of nominees and may appeal to the County Committee any time prior to August 15th.

In the event an eligible person does not receive a ballot, it may be obtained by contacting the county ASCS office.

Farm Women 11 Hear Lecture

Planning of a fall trip to the Poconos created most of the interest at a recent meeting of the Society of Farm Women 11 at the home of Mrs Norman Shirk, Quarryville Mrs Ammon Huber and Mrs Benjamin Wartel are on the committee to make arrangements

Co-hostesses were Mrs. Loran Bucher, and Mrs Norman Wood Roll call was answered by members giving their favorite Bible verse

Mrs Mary Herr and Mrs Huber gave a humorous skit. Big sister gifts were exchanged and a vegetable auction was held

Speaker of the afternoon was Miss Karen Boran, home economist from P P & L. who gave a demonstration on the preparation of various foods on electrical appliances

The August meeting of the group will be a picnic at Black Rock Retreat on Route 472, south of Quarryville Mrs Theodore Mathias, Mrs Mary McComsey, Mrs Donald Shirk and Mrs. James will be cohostesses.

Farm Women 1 Plan Boiling Of Apple Butter

Plans for the Applebutter Boiling at the Landis Valley Museum were discussed at the meeting of Farm Women No 1 held on Saturday afternoon at the home of Mrs W. Dean Fyock with Mrs. Martin Moore as cohostess.

The boiling wll take place on October 6th and 7th and Mrs Daniel Brubaker is the chairman.

Mrs. Fyock, the president, was in charge of the meeting and Mrs. Raymond Newcomer led the devotions. Robert Snyder of Bethlehem was the guest speaker. His subject was "State Birds" he showed pictures of various birds and told of their habitats and calls.

The group will hold a plant and food sale at the next meeting to be held at the home of Miss Rachel Bollinger on Septeber 1st.

● Grasslands Day

(From Page 1)

moved, and the eating will begin Electric slicers and expert carvers will operate at the pits. Four lines of serving tables will speed distribution of the piece de resistance to the hungry guests.

When the first six pits are opened the other six will be fired to produce a bed of coals for the second day's feast. The first six will be available again for the final day. Frank L Kreusberger, extension livestock specialist, the Pennsylvania State University, and Howard H. White, associate of Stephen's in Arbogast and Bastian, Allentown packing firm, will supervise the big roast

Other food facilities will include dairy bars to be operated by the Pennsylvania Dairymen's Association, Paul R. Anthony, Strausstown, president.

President Abraham Lincoln signed legislation establishing the United States Department of Agriculture on May 15,1862.

The Secret Of Successful Cattle Raising Is In The Feedlot.

That's Where Profits Are Made!

Steers in the feedlot require a large amount of feed — that's why home grown grains are so valuable! Economical feeding of your home grains and Red Rose Cattle Supplement will assure quick gains and good cattle profits.

32% Protein

RED ROSE®

CATTLE SUPPLEMENT

(available with or without Diethylstilbestrol)

Red Rose Cattle Supplement supplies sufficient protein, minerals and vitamins to balance farm roughages of hay, pasture, silage, grain and corn cobs. This is a complete supplement containing urea as a protein extender, and is fortified with high levels of vitamins A and D, trace minerals — plus an adequate level of phosphorus. TRY IT!

Local Firm Gets Award From USDA

A local firm last week was presented a "Big E" award by the Secretary of Agriculture, Orville Freeman, for the firm's unusual success in increasing agricultural exports.

John W. Eshleman and Sons was among nine firms or associations to be so honored.

The presentation was at a ceremony in the U. S. Department of Agriculture patio attended by leading representatives of the American export trade, by members of Congress and other government officials.

The "Big E" resembles the Army-Navy "E" flag awarded manufacturing firms for outstanding production effort in World War II. Today's awards were made under a program proclaimed by the President Dec 5, 1961, to encourage the expansion of U. S. exports to improve the U. S. balance of payments situation and to further the nation's world freedom objectives The program is being administered by the U S. Departments of Commerce and Agriculture and other government agencies.

Flag award winners are authorized to fly the blue and white "E" banner over their plants and offices, display an accompanying certificate of commendation; issue "E" lapel pins to employees, and refer to the award in advertising

Secretary Freeman presented the award to George Nieto, Director, Export Dept, John W Eshelman & Sons, 244 N. Queen Street, Lancaster, Pa.

"For substantial increase in the export of American feed products and premixes, successful pioneering and penetration of South American outlets for its products, and progressive expansion into world markets, by systematic study of potential markets and establishment of successful distributor and licensee arrangements, by providing technical services to customers; and by conduct of foreign language educational programs on farm management and animal nutrition."

Use the left-over corn on the cob. Cut the corn off the cob, using a sharp knife and cutting downward, and fold into quick bread, waffles, fritters, puffs or baked corn pudding or corn relish.

K-137 KimberCHIKS®...

10c to 34c MORE NET INCOME THAN OTHER MAJOR EGG STRAINS*

(35c more than average entry in 15 tests)

*Based on final reports in 1959-60 Random Sample Tests in Ariz., B.C., Calif., Fla., Ia., Minn., Mo., C.N.Y., W.N.Y., N.C., Pa., Tenn., Tex., Utah, and Wisc.

In the three 1959-60 tests in which the new K-155 Kimberchik was entered, it equalled the well-known K-137 in net income.

Longenecker's Hatchery

ELIZABETHTOWN, PA. EMpire 7-1545

COWS PROPERLY CONDITIONED ...during the dry period PRODUCE UP TO 25% MORE MILK!

BEFORE CALVING This cow was fitted on the Pioneer program for 60 days before calving. Note the excellent "dry cow" body condition.

AFTER COMPLETING RECORD The same cow after having produced 23,044 lbs. of milk and 941 lbs. of fat as a 4 year old. Note the extreme dairyness and exceptional body condition shown after this cow produced 11½ tons of milk!

600 pounds of PIONEER DRY and FRESHENING yields an extra TON OF MILK!

Proper feeding of the dry cow is the most important single factor affecting herd health, longevity, and a sustained high level of milk production. In 60 days, while the cow is dry, Pioneer Dry and Freshening feed will repair the body from the previous lactation, build a reserve of body condition for the next lactation, and develop a stronger calf. In addition your cows will have less calving difficulties, eliminate placenta quickly, have less udder congestion, and *most importantly they will produce up to* 25% more milk!

See us today for full particulars.

300 Attend 4-H Food Round Up

Fifty years of 4-H leadership on the part of two county women was honored last Tuesday night when the What's Cooking 4-H Club, Manheim-Lititz, held a surprise party for Mrs. Benjamin G Sheaffer and Mrs. J. Raymond Newcomer.

The party was held at the Lancaster County 4-H Foods Roundup and the leaders were presented with planters.

Mrs. Newcomer, who has been a leader for 20 years, accepted the gifts on behalf of herself and Mrs. Sheaffer, who was not present. Mrs. Sheaffer has been active in 4-H for 30 years as a leader.

Approximately 300 persons attended the roundup in the Penn Manor High School Barbara Gamble was mistress of ceremonies for an assembly. Taking part were Cynthia Bucher, pledge and songs, Evelyn Groff, bread demonstration, Kaye Ream, Junior Posture Queen, and Lois Johnston, Senior Posture Queen.

Displays were set up in the cafeteria with Mrs. Barbara Heistand in charge Extension home economists participating were Mrs. Norma DeLellis and Miss M. Jane Thurston.

The annual clothing roundup will be held Thursday at the school.

Zim'erman Herd High in DHIA

A Registered Holstein cow owned by Paul B Zimmerman, R1, Ephrata, completed the highest 305 day lactation. 6 produced 20,021 lbs. of milk, 748 lbs. of butterfat with a 3 7% test. Second high lactation was completed by a Registered Holstein cow owned by Paul E. Nissley, R1, Bainbridge Pat produced 17,210 lbs. of milk, 740 lbs of butterfat with a 4 3% test in 305 days.

The herd of Raymond and Louise Witmer, R1, Willow Street, had the highest monthly butterfat average. This herd of 45 0 Registered Guernsey cows averaged 1,129 lbs of milk, 59 lbs of butterfat with a 5 3% test The herd of Dan S. Stoltzfus, R1, Mt. Joy, placed second. This herd of 22.1 Registered Holstein cows averaged 1,459 lbs. of milk, 57 lbs of butterfat with a 3 9% test

SOIL CONSERVATION RELEASES PUBLICATION

The U.S. Soil Conservation Service has released a new publication "The Big Conservation Job is on Private Land". Since three-fourth of the Nation's land area is in private ownership, this bulletin has wide appeal. It tells its story largely through the use of pictures.

The Lancaster Work Unit, of the Soil Conservation Service, said that copies are available at the Service's office at 439 North Duke Street, Lancaster, Penna.

Forced air drying makes it possible for a farmer to harvest grain at a higher moisture content than otherwise

Holstein Club To Meet August 14

The Lancaster County Holstein Club Barn Meeting will be held on Tuesday August 14th at the Albert Fry Farm. Directions to the Fry farm are turn North at Chickies Creek on Route 230 west of Lancaster. (Watch for signs) Then turn south on Manheim-Mt Joy road at Erisman's Church

Classifier Richard E Keene will be present

County FFA Holds Barbecue, All Star Game

Nearly 200 Future Farmers turned out for the county FFA all-Star softball game and chicken barbecue last Wednesday night

The southern section, with three players each from Ephrata, New Holland Pequea Valley, Lampeter-Strasburg & Solanco High School, won the game by a score of 12 to 9 The losing team was made up of three players each from Penn Manor, Donegal, Elizabethtown Warwick and Manheim Central High Schools

Solanco Chapter FFA played host to the game and barbecue on the Quarryville Memorial field The event was sponsored by the Red Rose (county) Chapter and came at the end of the regular FFA softball tournament season

Assisting with the serving of the 200 meals was the Solanco FFA Chapter Sweetheart, Lucille Kreider, Drumore, as well as Jean Kreider and Margaret and Charlotte Weidler, all of Quarryville R1.

The affair was such a huge success that members are talking of making it a yearly affair

Soil scientists have encountered more than 300 different soils in Ohio.

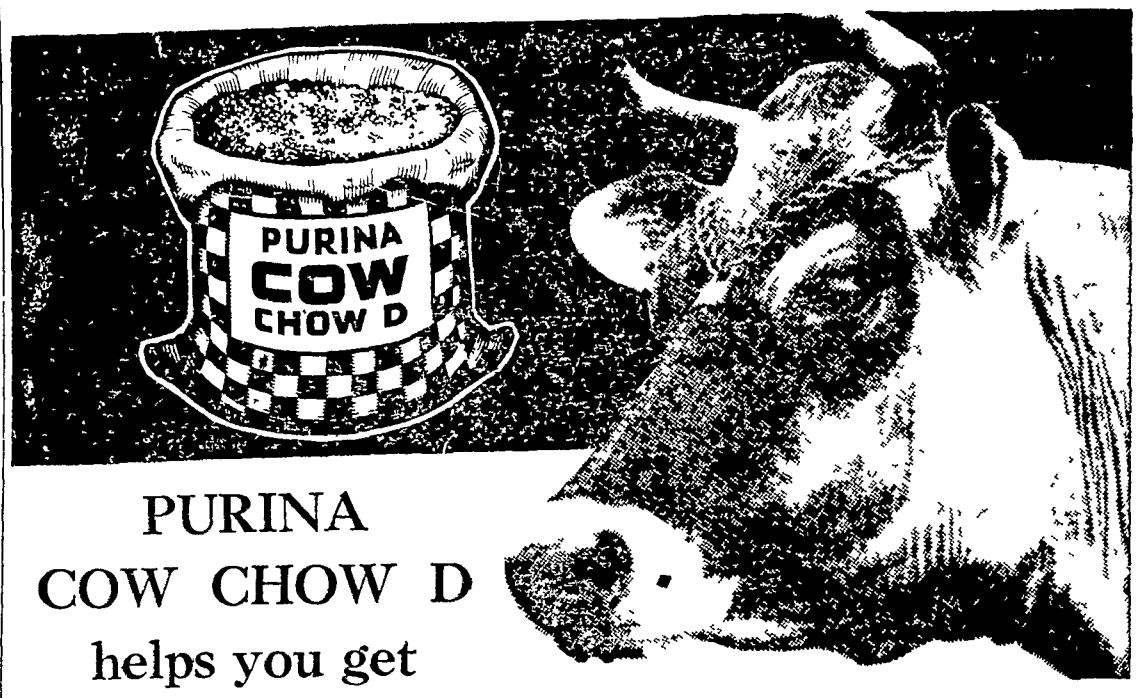
CHECKERBOARD service bulletin



PURINA COW CHOW D helps you get

UP TO A TON MORE MILK PER COW

Purina Cow Chow D was developed by the cows in the Purina Research Farm dairy herd. It took years of painstaking research to develop Cow Chow D, the ration that has the milk-making power to help cows give up to 2,000 lbs. more milk per year. If you're not feeding Purina Cow Chow D to your dairy cows now, come see us. We'll be happy to tell you more about it. Try Purina Cow Chow D — prove to yourself that Purina feeding costs you less.

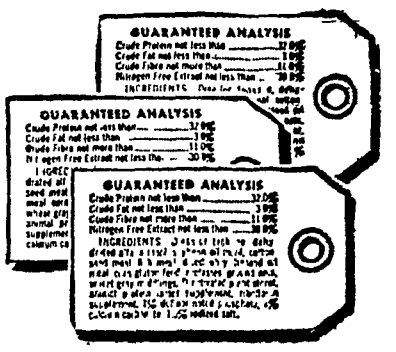
Do You Know . . .

The Ingredient Tag Doesn't Tell All?

Here's a good example of why feed shouldn't be bought on the basis of ingredient tags alone.

Three groups of hogs were fed rations carrying identical ingredient tags at the Purina Research Farm. One was a Purina ration . . . the other two were called X and Y. The three groups of hogs were fed to 165 days.

The Purina ration made a net profit of $12.71 per hog more than Ration Y and $6.46 more than Ration X. Though ingredient tags are important, here's positive proof they don't tell the profit story!



KNOCK OUT FLIES FAST!
Use Purina Dairy Spray

If annoying house flies and biting flies are irritating your cows, help get rid of them with Purina Dairy Spray. Dairy Spray protects your herd from these pests . . . helps cows produce all the milk that's in 'em.

Dairy Spray is safe to use in your barn, milkhouse, and feed room. It's made with a biting fly repellent, MGK 11, plus pyrethrin, lethane, and "Crag" fly repellent.

For complete fly control around your dairy farm, use Purina Dairy Spray and other Purina Fly Killers. They come in a variety of economical sizes at our Checkerboard Store.
